

The report you are to mark is report number: 29

Content (0.5 each, at most 5) 5/5 Poeng

- ☐ Relevant background is outlined.
- ☐ Gene is identified.
- ☐ The gene's inheritance pattern is described.
- ☐ The location of the gene is described.
- ☐ The expression pattern of the gene (in different tissues) is described.
- ☐ The protein encoded by the gene is described.
- ☐ Known function(s) of the gene/protein is(are) described.
- ☐ Information about association between the gene and the disease is provided.
- ☐ Conclusions are supported with data and/or evidence from the literature.
- ☐ Sources are complete and referenced properly (Vancouver style) within the text.

Form/style (1 each, at most 5) 5/5 Poeng

- ☐ The report is reader-friendly (anticipates and responds to the needs of the audience).
- ☐ The report is organized logically and clearly (structured to reflect scientific logic and/or reasoning).
- ☐ The report uses carefully focused, emphatic, and concise sentences (no awkward, wordy, or rambling sentences).
- ☐ The report uses correct grammar, spelling, and punctuation.
- ☐ Words are chosen for their precise meaning (no unnecessary jargon or overly general or vague words).

Feedback:

Something you did really well is...

Teksten din virker informativ og forståelig. Du gir en god oversikt over hva sigdcelleanemi er, hva som forårsaker det og hva slags symptomer det kan føre til. Du inkluderer også relevant informasjon om arvemønstre og genetikk. Det er noen få steder der ord og setninger kunne ha vært litt klarere, men generelt sett er det en god beskrivelse av sykdommen.

To write a better report next time, it would be helpful to...

Kan ikke se noe som mangler :)
